

# Create an application

## Application Details

### Name \*

Your application name. This is used to attribute the source of a tweet and in user-facing authorization screens. 32 characters max.

### Description \*

Your application description, which will be shown in user-facing authorization screens. Between 10 and 200 characters max.

### Website \*

Your application's publicly accessible home page, where users can go to download, make use of, or find out more information about your application. This fully-qualified URL is used in the source attribution for tweets created by your application and will be shown in user-facing authorization screens.

(If you don't have a URL yet, just put a placeholder here but remember to change it later.)

### Callback URL

Where should we return after successfully authenticating? OAuth 1.0a (<https://dev.twitter.com/oauth>) applications should explicitly specify their `oauth_callback` URL on the request token step, regardless of the value given here. To restrict your application from using callbacks, leave this field blank.

## Developer Agreement

☒ Yes, I have read and agree to the Twitter Developer Agreement (<https://dev.twitter.com/overview/terms/agreement-and-policy>).

Create your Twitter application
